Greeneye is committed to authentic, independent and credible research. All employees and managers at the company must strive to the highest quality of research for responsible investment purposes.

Our research will provide documented information on environmental, social and corporate governance criteria for Israeli companies. Data collection will be based on public documents and information as well as information disclosed by researched companies. We cross-reference data, maintain updated records and consistency. This is done in accordance to EIRIS methodology and quality systems, based on high quality standards. Every record is double checked by EIRIS approvers.

Greeneye is committed to verification through auditing and stakeholder involvement.

Greeneye strives to continue and enrich the knowledge of its employees in relevant issues, to maintain the quality of its research and develop its human resource.
